Important faces...

You do not have to be LGBT to support LGBT people. Just like you don't have to have been a victim of bullying to promote anti-bullying.

Harry Styles: "If you are black, if you are white, if you are gay, if you are straight, if you are transgender, I love you all."

Emmeline Pankhurst: "You must make women count as much as men."

Prince William "nobody should be bullied for their sexuality, or for any other reason"

Miley Cyrus: "No one should have to hide who they really are."

Dawn French "I am not, repeat not a lesbian, although I would like to be one when I grow up."

Is our school inclusive?

Is this a space where people can freely be themselves? Is everyone welcome? Do we accept all people? How do you know?
